Operational Intelligence (AI/Machine Learning & Analytics)

On premise　　Hybrid Cloud　　Public Cloud　　Managed Services

Integration

SCC has deep integration expertise across a plethora of different technologies. We help organisations to better connect data and systems to increase operational efficiency while providing a platform to monetize data and connect with third parties.

Some of the integration challenges we've solved are:

- The integration of core banking systems
- Integration into cloud based applications (e.g. Salesforce)
- Building API platforms to connect expose and consume data
- Connecting organisations with third parties via API's

Why SCC?

SCC has partnered with IBM for almost 40 years; SCC bridges the gap between business needs and technology to deliver world-class solutions. We know IBM inside out, from its technology to its people and vision, and whatever we do together delivers the strongest, most agile solution.

Maturity in the market means SCC is regularly building complex offerings and programs. With a specialist dedicated IBM team, we are able to offer that extra support needed when helping our customers plan, integrate and manage their projects.

Call and engage with SCC now to accelerate your business.
