

Optimise Your Cloud Costs with SCC and IBM Cloudability

Cloud adoption is on the rise, but so are the costs. SCC and IBM Cloudability provide a powerful solution to help organizations gain control over their cloud expenses through enhanced visibility, management, and optimisation.

Key Challenges:

- Lack of transparency and visibility in cloud spending
- Escalating costs without proper monitoring and budgeting
- Complexity of managing multi-cloud environments
- Difficulty in attributing costs to the right departments

Our Solution:

IBM Cloudability, supported by SCC, offers:

- **TotalCost Application:** Connects public cloud spend to indirect costs, providing comprehensive insights for better budget management.
- **Multi-Cloud Visibility:** Aggregates cost data from all cloud providers into a single view for coordinated planning and optimisation.
- **Sustained FinOps Practices:** Embeds FinOps practices to ensure long-term cost efficiency.
- **Assessment Impact Reports:** Evaluates current cloud spending to identify areas for improvement.

Benefits:

Reduce cloud unit costs by over 30%

Achieve financial accountability and efficiency

Cut app inventory by up to 50%

Why Choose SCC:

- Over 40 years of partnership with IBM
- Expertise in FinOps and ITAM consulting
- Flexible managed service options tailored to your needs
- Proven track record in delivering cost-optimised cloud solutions
