

CrowdStrike Cloud Security Risk Review

Overview –

What the service is:

- Organisations' cloud infrastructure is significantly increasing every organisation's attack surface and is becoming increasingly challenging to understand, manage, and protect.
- CrowdStrike Services Cloud Security Assessment** provides a comprehensive look into the security posture of your AWS/Microsoft/GCP environments, allowing you to detect and stop cloud-based threats.

Outcomes and key benefits:

Customer

- Have a one-on-one discussion about your cloud security strategy.
- Get insights into your overall cloud asset inventory, its security posture, and risks.
- Detect misconfigurations, vulnerabilities, and threats, and receive guided remediation options for cloud infrastructure and apps.
- Identify cloud resources that have fallen out of compliance and learn how to fix them.

- Expert guidance on findings and recommended next steps.
- Minimal engineering resource requirements.

Partner

- Excellent opportunity to provide significant value to your customers with minimal resources required.
- Significant license up-sell and professional services opportunities.

Getting started:

Contact crowdstrike_uk@ignition-technology.com to request the **free of charge** assessment.
Book in 2 x 30-minute sessions with CrowdStrike Cloud Security experts and end user.

The numbers:

75% increase in cloud intrusions.

\$4.75M was the average cost of a breach in 2023.

Only 54% of major code changes go through security reviews.

89% faster cloud detection and response.

(Mercury Financial customer success story – attached)

6 to 1 – Reduced six separate consoles to one unified console across cloud, endpoint, and identity.

(Mercury Financial customer success story)

\$380k average savings per year.

(Projected estimates of average benefit based on recorded metrics)
