

Gain total cloud visibility:

3 ways to optimise your Azure experience

You shouldn't have to compromise on total visibility. SCC Vision supports you to transform your cloud management strategy, helping you to realise operational efficiencies, enhance security and compliance, and optimise and manage costs.

With our single platform and suite of capabilities, you'll be able to get cloud-clear, feel cloud confident and achieve total cloud control. Explore how you can bring each of these three crucial areas into your business with the expansive benefits of SCC Vision.

1

Clarity

Gain access to detailed information and tracking to enhance your decision making.

SCC Vision elevates your operational efficiency through transparent SLAs, ticket tracking and management. While consumption tracking helps you to optimise cloud usage to maximise the value from your Azure services and curtail increasing costs.

It also supports you in your sustainability targets, providing detailed ESG reporting, from cloud consumption to carbon emissions tracking.

Stay ahead of risk and ensure availability is high, so you can remain confident that you are operating effectively.

SCC Vision provides proactive 24/7 security and cyber-risk management, and robust data protection to maintain trust, confidentiality, business continuity and compliance. It also seamlessly integrates with your existing IT infrastructure for a smooth transition to cloud-based services.

Beyond the benefits of the all-in-one platform, you're working with a provider with a proven track record in realising operational efficiencies, improving security, and enhancing cost management across verticals and sectors.

2

Confidence

Achieve innovative change faster in your organisation with greater knowledge and support.

SCC Vision delivers actionable, real-time insight into budgets and financials with multi-cloud cost data for granular oversight – helping you to stay in control of costs and make forward-thinking, value-based decisions that drive you towards high-impact business innovation.

You'll also gain access to a flexible, scalable and collaborative service that adapts to changing business needs with co-managed IT support options, so you can adapt and respond quickly to your evolving strategies.

See your cloud clearly with SCC Vision

SCC Vision's tools empower you to effortlessly manage and optimise your Azure cloud experience – and achieve compliant success.
